

"DataXstream provided results that I've not experienced from other consulting firms: they were quick to understand our business, they possess an exceptional knowledge of SAP and related technologies and they always respond quickly to our queries. Key Point... I am talking to the same guys in 2007 that I talked to in 1997."

Success Through Commitment

DataXstream consultants have both the experience and the commitment to make your SAP project successful. Whether your business is architecting a new system landscape, forming a new project team or redesigning existing processes, DataXstream can help you achieve success, getting the job done right the first time, on time, and on budget.

Experience Matters

- We pride ourselves on the depth of experience our consultants bring to an engagement.
- On average, our consultants have 10 years SAP project experience.
- Each of our consultants has been through at least 5 SAP implementations.
- DataXstream has a close relationship with SAP and access to their resources.
- Our team is highly specialized in SAP Netweaver Technologies and complimentary 3rd party tools.
- Our team understands that our success depends on our reputation.

DataXstream Success Stories

- Integrated Drager Medical's SAP solution with Federal Express Managed Warehouse.
- Implemented enterprise-wide SAP XI solution for Eli Lilly and Company.
- Deployed cforia A/R solution at Ferrero USA using proprietary XStream Connector Solution.

About DataXstream

Since 1996 we have been providing world-class integration and infrastructure consulting services to companies running SAP. We are specialists at integrating heterogeneous platform landscapes to deliver seamless business solutions.

In recent years we have expanded our portfolio to include software development and certification for SAP complimentary products as well as providing virtual integration infrastructure solutions. We are a preferred vendor and referral partner for SAP.
