

# DATA XSTREAM

Systems Integration & Architecture

## Intradeco Apparel Success Story

For Intradeco Apparel, the integration of their third-party Catalyst Warehouse Management software was paramount to the go-live of their SAP system. Intradeco had tried twice before to go live with SAP, each time ending in failure as the integration to their legacy system was not done well enough to limit business risk.

### DataXstream Responds

DataXstream consultants worked hand-in-hand with Intradeco to fully examine and correctly design key integration points into and out of their SAP system. This time, instead of canceling the go-live because of inadequacies in the design and lack of business risk mitigation, they were extremely confident that they had a system that was designed and architected for their business needs.

### Intradeco Results

Intradeco went live with their core business integration. The work done by the DataXstream team was ready to go from day one and architected to scale in size as their business needs grow. Today, Intradeco has leveraged SAP to their fullest extent and has acquired several other companies. Intradeco has expanded DataXstream's role as the go to partner for all their SAP functional and technical needs.

“DataXstream was by far the best partner during our SAP implementation. Their level of knowledge was extraordinary, their dedication was unquestionable and their integrity was never a matter of concern for us. I would recommend their services to any company that is serious about interfacing with SAP”
