

DATA XSTREAM

Systems Integration & Architecture

Vera Bradley Success Story

As part of Vera Bradley's SAP implementation, the EDI program was critical to the sales of their designer products. Having no internal resources to tackle this task and being on a tight deadline, Vera Bradley needed a means to rapidly integrate SAP and Gentran Server for Windows.

DataXstream Responds

DataXstream consultants worked hand-in-hand with Vera Bradley to analyze and design interface documents into and out of SAP. Working within a very tight Go-Live timeframe, DataXstream was able to code, test and implemented all interfaces successfully. Documentation was also created to assist the IT staff with the development of future customer interfaces.

Vera Bradley Results

Vera Bradley successfully implemented their EDI interfaces with SAP on time and on budget. Furthermore, the written documentation has allowed Vera Bradley to independently implement EDI with other business partners successfully.

"Being new to the EDI arena, our company needed someone who could lay the foundation from both an EDI and SAP perspective. Dick (DataXstream) was the perfect guy for the job. We couldn't have asked for more with his attention to detail, quality and quantity of work and detailed documentation."
